

ENVIRONMENTAL BENEFITS of COMPOST

ATLAS  ORGANICS

Avoids High Emission Waste Solutions

Food scraps in landfills produce **20x** as much CO₂ emissions as composting.

Landfills are one of the largest sources of harmful methane emissions in the US.

Builds Community Resiliency

Healthy soil & composting creates food security, profitable farms, local jobs, resilient ecosystems, community bonds, & healthy diets.

Sequesters Carbon

World soils hold around **1.5 trillion tons of carbon** as organic matter.

Just 1 acre of compost can sequester up to **75%** of a car's annual emissions.

Enhances Soil Quality

Grows healthier, more nutritious plants, & food. Prevents erosion & runoff.

The water retention of compost helps in extreme heat and flooding.
