

COMPOST SAVES MONEY

GARDENS AND YARDS

Using compost instead of synthetic fertilizers.
Watering less often due to increased water retention.
Reduces need for some pest and pathogen control.

HOMES

Use less trashbags by keeping food waste out of your trash cans.
With Compost House you can even earn free compost back.
Use less leaf bags for yard waste.

APARTMENT BUILDINGS

Less trash pickup will result in less trash service fees.
Supplying composting services has the added benefit of less smell.

LANDSCAPERS

The infiltration qualities of compost reduces irrigation costs.
Using compost also keeps newly laid sod from failing.
Using compost reduces the need for replanting.

CITIES

Helps meet municipal sustainability goals.
Less trash pickup will result in less trucking and hauling.
Reduces landfill intake and reduces methane from organic waste.
